Covers the weapons, vehicles, equipment, and systems used by the United States military In the spring of 1972, North Vietnam invaded South Vietnam in what became known as the Easter Offensive. Almost all of the American forces had already withdrawn from Vietnam except for a small group of American advisers to the South Vietnamese armed forces. The 23rd ARVN Infantry Division and its American advisers were sent to defend the provincial capital of Kontum in the Central Highlands. They were surrounded and attacked by three enemy divisions with heavy artillery and tanks but, with the help of air power, managed to successfully defend Kontum and prevent South Vietnam from being cut

in half and defeated. Although much has been written about the Vietnam War, little of it addresses either the Easter Offensive or the Battle of Kontum. In *Kontum: The Battle to Save South Vietnam*, Thomas P. McKenna fills this gap, offering the only in-depth account available of this violent engagement. McKenna, a U.S. infantry lieutenant colonel assigned as a military adviser to the 23rd Division, participated in the battle of Kontum and combines his personal experiences with years of interviews and research from primary sources to describe the events leading up to the invasion and the battle itself. *Kontum* sheds new light on the actions of U.S. advisers in combat during the Vietnam War. McKenna's book is not only an essential historical resource for America's most controversial war but a personal story of valor and survival. February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index Ever since Myanmar regained her independence in January 1948, the Tatmadaw (Myanmar Armed Forces) has been crucial in restoring and maintaining law and order. It is one of the most important institutions in Myanmar politics. Various aspects of the Tatmadaw have been studied. The most notable area of study has been the political role of the military. This study looks at the organizational development of the Myanmar armed forces. It analyses four different aspects of the Tatmadaw: military doctrine and strategy, organization and force structure, armament and force modernization, and military training and officer education. It sets out security perceptions and policies, charting developments in each phase against the situation at the time, and also notes the contributions of the leading actors in the process. Since early 1990s, the Tatmadaw has implemented a force modernization programme. This work studies rationales and strategy behind the force modernization programme and examines the military capabilities of the Tatmadaw. Drawing extensively from archival sources and existing literature, this empirically grounded research argues that, while the internal armed security threat to the state continues to play an important role, it is the external security threat that gives more weight to

the expansion and modernization of the Tatmadaw since 1988. It also argues that, despite its imperfections, the Tatmadaw has transformed from a force essentially for counter-insurgency operations into a force capable of fighting in limited conventional warfare. The Combat Studies Institute is pleased to announce its latest Special Study, *Fire for Effect: Field Artillery and Close Air Support in the US Army*, by historian John J. McGrath. The genesis of this work was the controversial decision in 2001 to deploy Army combat units to Afghanistan without their supporting field artillery units. *Fire for Effect* provides a historical survey of the relationship between field artillery and close air support (CAS) in the US Army since World War I. Reverse engineering encompasses a wide spectrum of activities aimed at extracting information on the function, structure, and behavior of man-made or natural artifacts. Increases in data sources, processing power, and improved data mining and processing algorithms have opened new fields of application for reverse engineering. In this book, we present twelve applications of reverse engineering in the software engineering, shape engineering, and medical and life sciences application domains. The book can serve as a guideline to practitioners in the above fields to the state-of-the-art in reverse engineering techniques, tools, and use-cases, as well as an overview of open challenges for reverse engineering researchers. Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada,

and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved. 'Jane's Infantry Weapons 2012-2012' provides the reader with a detailed country-by-country analysis of all small arms and crew-served weapons in service around the world. Details of development, technical description, specifications and images ensure ease of identification. *A Short History of the World* is a period-piece non-fictional historic work. The book was largely inspired by Wells's earlier 1919 work *The Outline of History*. It summarises the scientific knowledge of the time regarding the history of Earth and life and begins with its origins, goes on to explain the development of the Earth and life on Earth, reaching primitive thought and the development of humankind from the Cradle of Civilisation. The title of this book refers to the classic time and place for magic, witchcraft, and divination in Russia. *The Bathhouse at Midnight*, by one of the world's foremost experts on the subject, surveys all forms of magic, both learned and popular, in Russia from the fifth to the eighteenth century. While no book on the subject could be exhaustive, *The Bathhouse at Midnight* does describe and assess all the literary sources of magic, witchcraft, astrology, alchemy, and divination from Kiev Rus and Imperial Russia, and to some extent Ukraine and Belorussia. Where possible, Ryan identifies the sources of the texts (usually Greek, Arabic, or West European) and makes parallels to other cultures, ranging from classical antiquity to Finnic. He finds that Russia shares most of its magic and divination with the rest of Europe. Subjects covered include the Evil Eye, the Number of the Beast, omens, dreams, talismans and amulets, plants, gemstones, and other materials thought to possess magic properties. The first chapter gives a historical overview, and the final chapter summarizes the political, religious, and legal aspects of the history of magic in Russia. The author also provides translations of some key texts. *The Bathhouse at Midnight* will be invaluable for anyone—student, teacher, or general reader—with an interest in Russia, magic, or the occult. It is unique in its field and is set to become the definitive study of Russian magic. Feel at home among the stars with this acclaimed astronomy self-teaching guide . . . Modern Combat Pistols provides a comprehensive account of the development of military and police semi-automatic pistols and their ammunition from 1945 to present day. It follows on from the same authors critically acclaimed Assault Rifle [Crowood 2004]. The first part of the book looks at defensive and offensive pistols, the difference between military and police pistols, and special-purpose weapons such as silenced and underwater pistols. The history of the handgun before 1945 is described, and there is an examination both of the development of the semi-automatic pistol since 1945 and of future trends in pistol design. The second part of the book is divided up on a country-by-country basis. Each countrys section starts with a historical overview of pistol development in that country before giving a description and technical data for each individual weapon. Appendices cover technical aspects of semi-automatic and ammunition design. The Military Balance is an authoritative assessment of the military capabilities and defence economics of 171 countries.
