There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of the ecology of freshwater plants, their distribution and the different forms of control available including chemical and physical, and biological and biomanipulation. This series of papers from over 20 different countries was generated from the tenth in the highly successful series of European Weed Research Society symposia on aquatic plant management, this being the tenth. It provides a valuable insight into the complexities involved in managing aquatic systems, discusses state-of-the-art control techniques and deals with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants. The authorship of the papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations. "Crop Modeling and Decision Support" presents 36 papers selected from the International Symposium on Crop Modeling and Decision Support (ISCMDs-2008), held at Nanjing of China from 19th to 22nd in April, 2008. Many of these papers show the recent advances in modeling crop and soil processes,

crop productivity, plant architecture and climate change; the rests describe the developments in model-based decision support systems (DSS), model applications, and integration of crop models with other information technologies. The book is intended for researchers, teachers, engineers, and graduate students on crop modeling and decision support. Dr. Weixing Cao is a professor at Nanjing Agricultural University, China. Effective science communication is no easy task. While the effective conveyance of technical knowledge presents formidable roadblocks to sharing scientific knowledge and discoveries, certain communication tools like video and film production help to bridge this gap. This user's manual provides a complete set of easy-to-follow directions for video-making as well as tricks of the trade to leverage these skills to better inform the intended audience. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs Popular Mechanics inspires, instructs and influences readers to help them master the modern world. features and improvements Keith Underdahl, the author of *Digital Video For Dummies* (0-7645-4114-5) and other books on digital video, has broad experience as both an amateur videographer and professional video producer. Written by an author with solid teaching experience and extensive television production credentials--TV anchor, reporter, photographer, and editor, plus recipient of a regional Emmy award and other honors--this guide reminds readers of the big picture and what they're trying to accomplish. Includes tips on shooting high-quality video, creating professional voice-overs, and effective editing methods. For years, award-winning independent filmmaker Rick Schmidt has been teaching aspiring directors how to make "no-budget" films, both in workshops and in his classic guide *Feature Filmmaking at Used-Car Prices*. Now Schmidt shows them how it is easier—and cheaper—than ever to make an innovative, high quality work, thanks to digital video. Filled with the latest information on equipment and software, ideas for experimenting with new moviemaking techniques, and advice based on Schmidt's own experiences, *Extreme DV at Used-Car Prices* offers a step-by-step guided tour through the making of a feature-length movie using the newest and ever-changing DV technology. Schmidt shows how to:

- Take a DV project from idea to script (written or improvised), contract to pre-production and into the shoot
- Work with—and rally—the cast and crew
- Select affordable digital equipment to make a cutting-edge DV feature
- Edit a DV movie electronically with Final Cut Pro
- Promote one's work guerilla-style
- Live (and budget) creatively as a moviemaker
- Look ahead to what's on the DV horizon

Instructive and inspiring, this one-of-a-kind book is essential reading for filmmakers with lots of ideas but little money. The journal of cinematic illusions. Corporations, government offices, and academic institutions have long used video to educate and inform. The only thing that's changed is the people who are producing them: With low-priced equipment and easy-to-use software flooding the market, now

you're the person behind the camera, not some high-priced video specialist! This is the guide for you, then-and all of the other nonprofessionals who've been called upon to produce top-quality videos. Long on essentials-like where to place the camera, how to connect microphones, and which font to use in titles-and short on theory, this guide focuses instead on the simple steps and best practices needed to produce great videos. Veteran author Jan Ozer gives you the lowdown on shooting, audio, and lighting before describing the workflow and procedures involved in converting raw DV footage to streaming video and DVDs, and distributing the final product. For software-specific guidance, you can purchase downloadable PDF workbooks that use the book's projects to walk you through the production process.
