The Hitchhiker's Guide to Python takes the journeyman Pythonista to true expertise. More than any other language, Python was created with the philosophy of simplicity and parsimony. Now 25 years old, Python has become the primary or secondary language (after SQL) for many business users. With popularity comes diversity—and possibly dilution. This guide, collaboratively written by over a hundred members of the Python community, describes best practices currently used by package and application developers. Unlike other books for this audience, The Hitchhiker's Guide is light on reusable code and heavier on design philosophy, directing the reader to excellent sources that already exist. Going beyond a standard 72-hour bug out bag, this book shows you how to outfit escape vehicles and retreats in order to be able to survive for days, weeks or even months without civilization. Projects include outfitting a stationwagon, converting an RV and building secure shelters from shipping containers. Esta segunda edición del Manual de control de la calidad correspondiente a la tercera edición original se ha distinguido siempre como un trabajo de referencia para directores, supervisores e ingenieros en la industria. Tracy Calhoun, a longtime nurse, shares her heart-melting memoir of working alongside JJ, the Therapy Dog, the brightest and most intuitive dog Tracy has ever trained. When not mooching dog treats, JJ is dedicated to helping humans cope with tragedy and loss through love and hugs. Tracy Calhoun, a nurse on staff at Samaritan Evergreen Hospice House in Oregon, paused at the bedside of an elderly patient in a coma. The woman had no family or friends, but the hospice team had learned she liked dogs, so Tracy put her Golden Retriever, JJ, a staff “therapist,” on the woman’s bed. JJ snuggled up, nuzzled a motionless hand, and then settled in, letting her body warmth cuddle and comfort the patient in her final hours. The woman, who had been unresponsive for days, then performed her final, intentional act. She stroked JJ’s head. Tracy recorded the intimate moment on her phone, then uploaded it to Facebook where she was keeping a modest account for friends, family, and community members who knew her and JJ. In August 2015, that video went viral, and was rapidly seen by tens of millions of viewers worldwide. To Tracy, it was a turning point in her mission to explain to a wider audience the joy that therapy dogs provide, and to do it with humor and canine chaos, as only a dog obsessed with bacon, puppies, and swimming can. Along the way, Tracy’s own story has

grown and changed through her love of animals, and she's found, in difficult times, she has needed the same comfort her pups offer to patients—for herself. "These stories of an unforgettable and deeply intuitive Golden Retriever named JJ, as told by her fabulous handler Tracy, are shared with humor and heart. Many wonderful moments happen when working with therapy dogs and reading about JJ's magic is an extraordinarily moving experience." — Donna Frindt, Executive Director, Project Canine "An emotionally satisfying and entertaining collection of tales not only between a dog and her human, but between this remarkable soul in a Golden Retriever suit and dozens of people in crisis—from hospice care to school shootings." —Janet Velanovsky , Owner, Kaizen Pet Training & Behavior "An inspiring memoir, JJ's Journey illustrates the medical and spiritual benefits of the human-animal bond through JJ's unwavering patience, love, and support for the hospice patients and their grieving families. JJ's Journey brings to light that in our greatest time of need, every person can feel they are loved, honored, and mean something in this world thanks to the unconditional love that comes so naturally from a therapy dog's heart." —Colby Webb, Founder, Sav-a-Bull Rescue and author of Forty One Pit Bulls "Total car care is the most complete, step-by-step automotive repair manual you'll ever use. All repair procedures are supported by detailed specifications, exploded views, and photographs"--Page [4] cover. "This important publication is the final report of the most recent expert group meeting, the Joint FAO/WHO/UNU Expert Consultation on Human Energy Requirements, convened in October 2001 at FAO headquarters in Rome, Italy ... As sports have become more competitive over recent years researchers and trainers have been searching for new and innovative ways of improving performance. Ironically, an area as mundane as what an athlete eats can have profound effects on fitness, health and ultimately, performance in competition. Sports have also gained widespread acceptance in the therapeutic management of athletes with disorders associated with nutritional status. In addition, exercise has been one of the tools used for studying the control of metabolism, creating a wealth of scientific information that needs to be placed in the context of sports medicine and science. Nutrition in Sport provides an exhaustive review of the biochemistry and physiology of eating. The text is divided into three sections and commences with a discussion of the essential elements of diet, including sections on carbohydrates, proteins, fats, vitamins and trace elements, and drugs associated with nutrition. It also discusses athletes requiring special consideration, including vegetarians and diabetics. The second section considers the practical aspects of sports nutrition and discusses weight control (essential for sports with weight categories and athletes with eating disorders), the travelling athlete (where travel either disrupts established feeding patterns or introduces new hazards), environmental aspects of nutrition (including altitude and heat), and the role of sports nutritional products. In Racing Toward Zero, the authors explore the issues inherent in developing sustainable transportation. They review the types of propulsion systems and vehicle options, discuss low-carbon fuels and alternative energy sources, and examine the role of regulation in curbing emissions. All technologies have an impact on the environment, from internal combustion engine vehicles to battery electric vehicles, fuel cell electric vehicles, and hybrids--there is no silver bullet. The battery electric vehicle may seem the obvious path to a sustainable, carbon-free transportation future, but it's not the only, nor necessarily the best, path forward. The vast majority of vehicles today use the internal combustion engine (ICE), and this is unlikely to change anytime soon. Improving the ICE and its fuels--entering a new ICE age--must be a main route on the road to zero emissions. How do we go green? The future requires a balanced approach to transportation. It's not a matter of choosing between combustion or electrification; it's combustion and electrification. As the authors say, "The future is eclectic." By harnessing the best qualities of both technologies, we will be in the best position to address our transportation future as quickly as possible.
