Substance Use Disorders in the U.S. Armed Forces Jan 11 2021 Problems stemming from the misuse and abuse of alcohol and other drugs are by no means a new phenomenon, although the face of the issues has changed in recent years. National trends indicate substantial increases in the abuse of prescription medications. These increases are particularly prominent within the military, a population that also continues to experience long-standing issues with alcohol abuse. The problem of substance abuse within the military has come under new scrutiny in the context of the two concurrent wars in which the United States has been engaged during the past decade-in Afghanistan (Operation Enduring Freedom) and Iraq (Operation Iraqi Freedom and Operation New Dawn). Increasing rates of alcohol and other drug misuse adversely affect military readiness, family readiness, and safety, thereby posing a significant public health problem for the Department of Defense (DoD). To better understand this problem, DoD requested that the Institute of Medicine (IOM) assess the adequacy of current protocols in place across DoD and the different branches of the military pertaining to the prevention, screening, diagnosis, and treatment of substance use disorders (SUDs). Substance Use Disorders in the U.S. Armed Forces reviews the IOM's task of assessing access to SUD care for service members, members of the National Guard and Reserves, and military dependents, as well as the education and credentialing of SUD care providers, and offers specific recommendations to DoD on where and how improvements in these areas could be made.

Black Ephemera Aug 18 2021 A framework for understanding the deep archive of Black performance in the digital era In an era of Big Data and algorithms, our easy access to the archive of contemporary and historical Blackness is unprecedented. That iterations of Black visual art, such as Bert Williams's 1916 silent film short "A Natural Born Gambler" or the performances of Josephine Baker from the 1920s, are merely a quick YouTube search away has transformed how scholars teach and research Black performance. While Black Ephemera celebrates this new access, it also questions the crisis and the challenge of the Black musical archive in a moment when Black American culture has become a global export. Using music and sound as its primary texts, Black Ephemera argues that the cultural DNA of Black America has become obscured in the transformation from analog to digital. Through a cross-reading of the relationship between the digital era and culture produced in the pre-digital era, Neal argues that Black music has itself been reduced to ephemera, at best, and at worst to the background sounds of the continued exploitation and commodification of Black culture. The crisis and challenges of Black archives are not simply questions of knowledge, but of how knowledge moves

and manifests itself within Blackness that is obscure, ephemeral, fugitive, precarious, fluid, and increasingly digital. *Black Ephemera* is a reminder that for every great leap forward there is a necessary return to the archive. Through this work, Neal offers a new framework for thinking about Black culture in the digital world.

On the Other Side of Chaos Jun 03 2020 Based in part on her own family's journey, Ellen Van Vechten explains the science of addiction, the theory of treatment, and the twelve-step model of recovery, providing sensible information and tips for reasoned action in support of a loved one while fostering personal growth and recovery. Powerlessness over another's addiction has a caustic effect on the family. Too often parents and partners equate "letting go" with "giving up." While acceptance of a lack of control is essential to coping with the disease within the family system, there is nothing passive about supporting a partner or child in their journey to recovery. This concept is the foundation of Van Vechten's original approach to empower individuals with knowledge, which when coupled with acceptance allows any family dealing with active addiction to make thoughtful and reasoned decisions to facilitate the recovery of both their loved ones and themselves.
