Guide to French Literature A Directory of Computer Software Applications European Access Maserati Owner's Handbook Sixth International Conference on Information Technology

The Maserati Owner's Handbook, originally published by Floyd Clymer in 1961 is packed with photos, manuals and specs of the great Maseratis from the early pre-war cars to the glory days of the postwar 1950s. Includes an introduction by Pete Vack. A must have for the Maserati enthusiast. Half the world's languages are threatened with extinction over the next century, as English and the rest of the world's top twenty languages drive all before them. What ways of looking at the world will die along with them, what cultural riches, what experiences, histories and memories? And how does it feel to be one of the last remaining speakers of a language that is on its way to extinction? What chance is there of saving any of these languages? Is it feasible in the long term or even worthwhile? Mark Abley's journeys among the speakers of languages at the brink takes him to aboriginal Australia (where he meets the last surviving fluent male speaker of Mati Ke, who cannot speak to the only other fluent speaker, as she is his sister and in their culture it is forbidden to speak to siblings once one has reached puberty) and to American Indian reservations, as well as to places where the languages are fighting back - Wales, the Faeroe islands, the Isle of Man - whilst also charting the triumphant return of Hebrew. While the computer (hardware) is a physical reality, software is hard to describe. It cannot be touched, tasted, or seen, but it must be built and maintained. It ages, becomes obsolete, and often breaks--but not in the sense that a transistor or a disk drive fails. It is this realization that separates the current view of software from that of 30 years ago. What is software? The "Computer" articles reprinted in this volume explore some of the answers to that question. The articles selected address four topics: programming languages, software creation, data bases, and applications. With the completion of the single market, an increasing number of unstructured information sources are available. This Directory is therefore aimed at providing practical and comprehensive guidance on EC business information sources in an accessible format. It provides information on legislative and consultative procedures and relevant published and organisational sources. Entries are arranged under NACE classification, the system which superseded the current UK SIC system during 1991. The Directory is an invaluable EC business reference source and complements its UK equivalent, The Macmillan Directory of Business Information Sources (UK), EC Industry. The first comprehensive introduction to the origins, aspirations, and evolution of live coding. Performative, improvised, on the fly: live coding is about how people interact with the world and each other via code. In the last few decades, live coding has emerged as a dynamic creative practice gaining attention across cultural and technical fields—from music and the visual arts through to computer science. Live Coding: A User's Manual is the first comprehensive introduction to the practice, and a broader cultural commentary on the potential for live coding to open up deeper questions about contemporary cultural production and computational culture. This multi-authored book—by artists and musicians, software designers, and researchers—provides a practice-focused account of the origins, aspirations, and evolution of live coding, including expositions from a wide range of live coding practitioners. In a more conceptual register, the authors consider liveness, temporality, and knowledge in relation to live coding, alongside speculating on the practice's future forms. Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database. This guide surveys the lives and works of 300 famous French writers. Entries are devoted to the primary writers, with some entries on important movements, literary groups and publications.
