***Spanish-Language Narration and Literacy Jan 06 2021 This book is divided into three main topical sections: (1) Parent-child construction of narrative, which focuses on aspects of the social interaction that facilitate oral narrative development in Spanish-speaking children; (2) Developing independent narration by Spanish-speaking children; and (3) Narrative links between Latino children's oral narration and their emergent literacy and other school achievements. Chapters address narration to and by Latino children aged six months to eleven years old and in low, middle, and upper socioeconomic groups. Nationalities of speakers include the following: Costa Rican, Dominican, Ecuadorian, Mexican, Peruvian, Puerto Rican, Venezuelan, and Spanish-English bilingual children who are citizens or residents of the United States. Narratives studied include those in conversations, personal and fictional stories, and those prompted by wordless picture books or videos.***

***Thus, the current project includes diverse nationalities, socioeconomic backgrounds, and genres of narrative.***

***Handbook of Cultural Psychology, First Edition May 22 2022 Bringing together leading authorities, this definitive handbook provides a comprehensive review of the field of cultural psychology. Major theoretical perspectives are explained, and methodological issues and challenges are discussed. The volume examines how topics fundamental to psychology—identity and social relations, the self, cognition, emotion and motivation, and development—are influenced by cultural meanings and practices. It also presents cutting-edge work on the psychological and evolutionary underpinnings of cultural stability and change. In all, more than 60 contributors have written over 30 chapters covering such diverse areas as food, love, religion, intelligence, language, attachment, narratives, and work.***

***The Quest for the Perfect Hive Sep 26 2022 Beekeeping is a sixteen-billion-dollar-a-year business. But the invaluable honey bee now faces severe threats from diseases, mites, pesticides, and overwork, not to mention the mysterious Colony Collapse Disorder, which causes seemingly healthy bees to abandon***

***their hives en masse, never to return. In *The Quest for the Perfect Hive*, entomologist Gene Kritsky offers a concise, beautifully illustrated history of beekeeping, tracing the evolution of hive design from ancient Egypt to the present. Not simply a descriptive account, the book suggests that beekeeping's long history may in fact contain clues to help beekeepers fight the decline in honey bee numbers. Kritsky guides us through the progression from early mud-based horizontal hives to the ascent of the simple straw skep (the inverted basket which has been in use for over 1,500 years), from hive design's Golden Age in Victorian England up through the present. He discusses what worked, what did not, and what we have forgotten about past hives that might help counter the menace to beekeeping today. Indeed, while we have sequenced the honey bee genome and advanced our knowledge of the insects themselves, we still keep our bees in hives that have changed little during the past century. If beekeeping is to survive, Kritsky argues, we must start inventing again. We must find the perfect hive for our times. For thousands of years, the honey bee has been a vital part of human culture. *The Quest for the Perfect Hive* not only offers a colorful account of this long history, but also provides***

***a guide for ensuring its continuation into the future.***

***Mobile Health Technologies Jan 18 2022***  
***Mobile Health Technologies, also known as mHealth technologies, have emerged, amongst healthcare providers, as the ultimate Technologies-of-Choice for the 21st century in delivering not only transformative change in healthcare delivery, but also critical health information to different communities of practice in integrated healthcare information systems. mHealth technologies nurture seamless platforms and pragmatic tools for managing pertinent health information across the continuum of different healthcare providers. mHealth technologies commonly utilize mobile medical devices, monitoring and wireless devices, and/or telemedicine in healthcare delivery and health research. Today, mHealth technologies provide opportunities to record and monitor conditions of patients with chronic diseases such as asthma, Chronic Obstructive Pulmonary Diseases (COPD) and diabetes mellitus. The intent of this book is to enlighten readers about the theories and applications of mHealth technologies in the healthcare domain.***

***Chemical Composition and Biological***

## ***Activities of Essential Oil Apr 09 2021***

***Essential oils extracted by the distillation or hydrodistillation of aromatic plants are a complex mixture of volatile compounds with several biological activities. Their efficacy as antimicrobial agents is related to the activity of several natural compounds belonging to different chemical families that can act both in synergy with each other and with other antibiotics. The antibiotic resistance detected among pathogens has been quickly increasing in recent years, and the control of some of these microorganisms is becoming a planetary emergency for human and animal health. The control of the microbial growth is a problem of great importance also for the food industry (food deterioration and shelf life extension) and for the world of cultural heritage (indoor and outdoor phenomena of biodeterioration). Essential oils can play an important role in this scenario, due their recognized broad-spectrum antimicrobial activity. Therefore, the main subject of this Special Issue includes an essential oil-based approach to control microorganisms in areas such as human and veterinary medicine, entomology, food industry and agriculture. In addition, the chemical composition of essential oils from endemic and rare medicinal/aromatic plants,***

***Social interaction, Social Context, and Language Jun 11 2021 This collection of essays is a representative sample of the current research and researchers in the fields of language and social interactions and social context. The opening chapter, entitled "Context in Language," is written by Susan Ervin-Tripp, whose diverse and innovative research inspired the editors to dedicate this book to her honor. Ervin-Tripp is known for her work in the fields of linguistics, psychology, child development, sociology, anthropology, rhetoric, and women's studies. She has played a central role in the definition and establishment of psycholinguistics, child language development, and sociolinguistics, and has been an innovator in terms of approaches and methods of study. This book covers a wide range of research interests in***

***the field, from linguistically oriented approaches to social and ethnography oriented approaches. The issue of the relationships between forms and structures of language and social interactions is examined in studies of both adult and child speech. It is a useful anthology for graduate students studying language and social interaction, as well as for researchers in this field.***

***Notes from the Hyena's Belly Oct 03 2020 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.***

***Interview Questions In C Programming Feb 25 2020 As most of you are aware, the road to a successful career in Software starts with a series of Written Technical Tests conducted by***

**most IT companies in India. These companies test you fundamental skills in programming and design in three major areas- C Programming, Data Structures and C++ Programming. Most of you may have prepared for that "dream test" without knowing the exact pattern, the level and the difficulty of questions that appear in such tests. As a result, you are not able to give your best performance in these tests. This "Interview Questions" series addresses these concerns and is aimed at giving you the necessary practice and confidence to help you crack these tests. This series presents a whole gamut on questions on different topics in each of these three subjects- C. DS and C++. This volume is dedicated to topics like : Contents Data types Operators Pointers Advanced Storage Classes Arrays Structures Control Instructions Functions Pointer Concepts Preprocessor Directives Strings Unions**

**Handbook of Research Methods in Human Memory and Cognition Apr 21 2022 Handbook of Research Methods in Human Memory and Cognition is a compilation of critical examinations of major contemporary research methods in the area of human memory and cognition. The book covers topics that are defined in terms of experimental tasks and**

**materials, aiming to introduce newcomers to the range of methodologies available and allow flexibility of choices for established investigators on how to attack the problem. ***Narrative Development May 10 2021 Growing out of an International Society of the Study of Behavioral Development-sponsored symposium, this book discusses the basic assumptions that led the contributors to conduct research in the field of narrative development. This collection gathers their research reflections and varying approaches to narrative and its development. It illustrates each type of approach and highlights their respective motives. The book presents some of the basic motivating assumptions of each***

***approach and provides insight into what holds each set of assumptions together, potentially transforming them into actions. This book will serve as an excellent text for courses emphasizing multiple approaches to the study of narrative. The editor has organized this volume in accordance with the six main points of the symposium: \* Specification of the Domain--how narratives are defined in terms of textual structures, knowledge thereof, interactive moves, sociocultural conventions, and the like. \* The Individual's Involvement in the Developmental Process--the relationship between some internal or external forces and the organism's own active participation in the developmental process. \* The Course of Development--if it is continuous or discontinuous; whether it proceeds in an additive fashion or whether regressive phases occur; and what changes at different points in the developmental process signify. \* The Goal of Development--the implicit notion of a telos, a target or end-point that needs to occur in the developmental process. \* Mechanisms of Development--the forces and/or conditions that both instigate the developmental process and keep it moving toward its telos. \* Methodology--where and how to look in the establishment of a developmental framework.***

***This book is an indispensable text in the fields of narrative and/or discourse, linguistics, language studies, psychology, and education in general.***

***The Archaeology of Beekeeping Aug 13 2021  
Whispering Sands Mar 08 2021 Erle Stanley Gardner wrote these adventure stories during the Great Depression, after traveling through the Southwest and collecting legends about Western Americana and the lure of gold***

***Ethnobotany Oct 15 2021 Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development. Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the compilation of lists. Recently, these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and, as a consequence, have used a much more ecological approach. This manual of ethnobotanical methodology will become an essential tool for all***

***ethnobiologists and ethnoecologists. It fills a significant gap in the literature and I only wish it had been available some years previously so that I could have given it to many of my students. I shall certainly recommend it to any future students who are interested in ethnoecology. I particularly like the sympathetic approach to local peoples which pervades this book. It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained researchers. A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied. This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders.***

***Simplicity, Inference and Modeling Mar 28 2020 The idea that simplicity matters in science is as old as science itself, with the much cited example of Ockham's Razor, 'entia non sunt multiplicanda praeter necessitatem': entities are not to be multiplied beyond necessity. A problem with Ockham's razor is that nearly everybody seems to accept it, but few are able to define its exact meaning and to make it operational in a non-arbitrary way. Using a multidisciplinary perspective***

***including philosophers, mathematicians, econometricians and economists, this 2002 monograph examines simplicity by asking six questions: what is meant by simplicity? How is simplicity measured? Is there an optimum trade-off between simplicity and goodness-of-fit? What is the relation between simplicity and empirical modelling? What is the relation between simplicity and prediction? What is the connection between simplicity and convenience? The book concludes with reflections on simplicity by Nobel Laureates in Economics.***

***Automatic Item Generation Nov 16 2021 The purpose of this book is to bring researchers and practitioners up-to-date on the growing body of research on Automatic Item Generation by organizing in one volume what is currently known about this research area.***

***Anomia Sep 14 2021 Anomia is the inability to access spoken names for objects, most often associated with the elderly or those with brain damage to the left hemisphere. ***Security in Translation Aug 01 2020 Security in Translation proposes an innovative way to capture the evolution, spread and local transformation of threat images in world affairs. Reworking traditional securitization theory, this book develops a coherent new framework for analysis that makes securitization theory applicable to empirical studies.***

***Radar Instruction Manual Dec 29 2022 Since***

***1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs***

***Fire in the Ashes May 30 2020 In this powerful and culminating work about a group of inner-city children he has known for many years, Jonathan Kozol returns to the scene of***

***his prize-winning books *Rachel and Her Children* and *Amazing Grace*, and to the children he has vividly portrayed, to share with us their fascinating journeys and unexpected victories as they grow into adulthood. For nearly fifty years Jonathan has pricked the conscience of his readers by laying bare the savage inequalities inflicted upon children for no reason but the accident of being born to poverty within a wealthy nation. A winner of the National Book Award, the Robert F. Kennedy Book Award, and countless other honors, he has persistently crossed the lines of class and race, first as a teacher, then as the author of tender and heart-breaking books about the children he has called "the outcasts of our nation's ingenuity." But Jonathan is not a distant and detached reporter. His own life has been radically transformed by the children who have trusted and befriended him. Never has this intimate acquaintance with his subjects been more apparent, or more stirring, than in *Fire in the Ashes*, as Jonathan tells the stories of young men and women who have come of age in one of the most destitute communities of the United States. Some of them never do recover from the battering they undergo in their early years, but many more battle back with fierce and, often, jubilant***

**determination to overcome the formidable obstacles they face. As we watch these glorious children grow into the fullness of a healthy and contributive maturity, they ignite a flame of hope, not only for themselves, but for our society. The urgent issues that confront our urban schools - a devastating race-gap, a pathological regime of obsessive testing and drilling students for exams instead of giving them the rich curriculum that excites a love of learning - are interwoven through these stories. Why certain children rise above it all, graduate from high school and do well in college, while others are defeated by the time they enter adolescence, lies at the essence of this work. Jonathan Kozol is the author of *Death at an Early Age*, *Savage Inequalities*, and other books on children and their education. He has been called "today's most eloquent spokesman for America's disenfranchised." But he believes young people speak most eloquently for themselves; and in this book, so full of the vitality and spontaneity of youth, we hear their testimony.**
