Summer Melt Nov 28 2019 Under increasing pressure to raise graduation rates and ensure that students leave high school college- and career-ready, many school and district leaders may believe that, when students graduate with college acceptances in hand, their work is done. But as Benjamin L. Castleman and Lindsay C. Page show, summer can be a time of significant attrition among college-intending seniors—especially those from low-income families. Anywhere from 10 to 40 percent of students presumed to be headed to college fail to matriculate at any postsecondary institution in the fall following high school. *Summer Melt* explores the complex factors that contribute to this trend—the absence of school support, confusion over paperwork, lack of parental guidance, and the teenage tendency to procrastinate. The authors draw on findings from fields such as neuroscience, behavioral economics, and social psychology to contextualize these factors. Drawing on a series of research studies, they show how schools and districts can develop effective, low-cost, scalable responses—including counselor outreach, peer mentoring, and using text messages and social media—to help students stay on track over the summer. *Summer Melt* offers very practical guidance for schools and districts committed to helping their students make the transition to college.

The 160-Character Solution Mar 25 2022 By focusing on behavioral changes, Castleman demonstrates that small changes in how we ask questions, design applications, and tailor reminders can have remarkable impacts on student and school success.

Ready to Learn Feb 21 2022 Countries that have sustained rapid growth over decades have typically had a strong public commitment to expanding education as well as to improving learning outcomes. South Asian countries have made considerable progress in expanding access to primary and secondary schooling, with countries having achieved near-universal enrollment of the primary-school-age cohort (ages 6+–11), except for Afghanistan and Pakistan. Secondary enrollment shows an upward trend as well. Beyond school, many more people have access to skilling opportunities and higher education today. Although governments have consistently pursued policies to expand access, a prominent feature of the region has been the role played by nonstate actors—private nonprofit and forprofit entities—in expanding access at every level of education. Though learning levels remain low, countries in the region have shown a strong commitment to improving learning. All countries in South Asia have taken the first step, which is to assess learning outcomes regularly. Since 2010, there has been a rapid increase in the number of large-scale student learning assessments conducted in the region. But to use the findings of these assessments to improve schooling, countries must build their capacity to design assessments and analyze and use findings to inform policy.

The Use of Data in School Counseling Aug 18 2021 Reach ALL students and prove how critical your counseling program is! For school counselors, using data effectively doesn't have to be a burden. Data can make the difference for today's embattled school counseling programs, and this insightful book shows how to collect and manage it. School counseling scholar and advocate Dr. Trish Hatch describes how K–12 counselors can replace "random acts of guidance" with intentional, well-timed interventions, based on student data. Aligned with current research

and the American School Counselor Association (ASCA) standards, this essential resource includes a complete set of tools and templates for data collection, action-planning and reporting. Readers will learn how to Develop a robust counseling curriculum that supports the Common Core Standards and drop-out prevention Measure progress through pre- and post-assessments Deliver compelling reports that demonstrate your program's impact This well-timed book is designed to help school counseling programs make the most of limited resources and measurably demonstrate how their work improves school performance. "Trish Hatch provides extensive examples of how school counselors can enhance student achievement and well-being through the use of data. Not only does she provide useful examples and a framework from which counselors can explore data, she helps counselors understand some of the very common barriers to change within school systems." —Jennifer Betters-Bubon, Assistant Professor UW Whitewater, WI "As practicing school counselors, we rarely find a text that tells us what to do, why we should do it, and how to do it. Priceless!" —Franciene Sabens, School Counselor Chester High School, IL Looking for more resources on data in school counseling? Check out the online course Data! Data! Data!

On Course, Study Skills Plus Edition Jan 29 2020 ON COURSE: STRATEGIES FOR CREATING SUCCESS IN COLLEGE AND IN LIFE, STUDY SKILLS PLUS EDITION was created for educators who would like to promote student growth and self-awareness, while providing more extensive instruction in study skills. Downing's powerful guided journal entries have been retained from the original ON COURSE text to encourage students to explore essential life skills such as personal responsibility, self-motivation, interdependence, and self-esteem. The Study Skills Plus Edition engages students in a learner-centered construction of study skills knowledge, and gives students practice in applying empowerment strategies. The 2nd edition highlights the very process of learning how to solve academic challenges with improved study skills.

Students engage in critical and creative problem solving that will enable them to achieve greater success in all parts of their lives. The 2nd edition also features expanded coverage of diversity, emphasizing the many ways in which people are different and how these differences often influence the choices they make. Other new topics include a discussion of academic integrity, how to thrive in the college culture, and a research-based section on the importance of developing a growth mindset. Plus, a new Annotated Instructors Edition guides instructors to relevant exercises and materials in the ON COURSE FACILITATOR'S MANUAL. Legacies of the War on Poverty Feb 09 2021 Many believe that the War on Poverty, launched by President Johnson in 1964, ended in failure. In 2010, the official poverty rate was 15 percent, almost as high as when the War on Poverty was declared. Historical and contemporary accounts often portray the War on Poverty as a costly experiment that created doubts about the ability of public policies to address complex social problems. Legacies of the War on Poverty, drawing from fifty years of empirical evidence, documents that this popular view is too negative. The volume offers a balanced assessment of the War on Poverty that highlights some remarkable policy successes and promises to shift the national conversation on poverty in America. Featuring contributions from leading poverty researchers, Legacies of the War on Poverty demonstrates that poverty and racial discrimination would likely have been much greater today if the War on Poverty had not been launched. Chloe Gibbs, Jens Ludwig, and Douglas Miller dispel the notion that the Head Start education program does not work. While its impact on children's test scores fade, the program contributes to participants' long-term educational achievement and, importantly, their earnings growth later in life. Elizabeth Cascio and Sarah Reber show that Title I legislation reduced the school funding gap between poorer and richer states and prompted Southern school districts to desegregate, increasing educational opportunity for African Americans. The volume also examines the significant consequences of income support, housing, and health care programs. Jane Waldfogel shows that without the era's expansion of food stamps and other nutrition programs, the child poverty rate in 2010 would have been three percentage points higher. Kathleen McGarry examines the policies that contributed to a great success of the War on Poverty: the rapid decline in elderly poverty, which fell from 35 percent in 1959 to below 10 percent in 2010. Barbara Wolfe concludes that Medicaid and Community Health Centers contributed to large reductions in infant mortality and increased life expectancy. Katherine Swartz finds that Medicare and Medicaid increased access to health care among the elderly and reduced the

risk that they could not afford care or that obtaining it would bankrupt them and their families. Legacies of the War on Poverty demonstrates that well-designed government programs can reduce poverty, racial discrimination, and material hardships. This insightful volume refutes pessimism about the effects of social policies and provides new lessons about what more can be done to improve the lives of the poor.

Tax Policy and the Economy Nov 01 2022 Taxation policy was a central part of the policy debates over the "fiscal cliff." Given the importance of fiscal issues, it is vital for rigorous empirical research to inform the policy dialogue. In keeping with the NBER's tradition of carrying out rigorous but policy-relevant research, Volume 27 of Tax Policy and the Economy offers insights on a number of key tax policy questions. This year's volume features six papers by leading scholars who examine the tax treatment of tuition at private K-12 schools, the potential streamlining of the federal rules for post-secondary financial aid and the use of tax return information in this process, the effect of tax and benefit programs on incentives to work, the macroeconomic effects of fiscal adjustments, and the set of factors that contributed to the weakening US fiscal outlook in the last decade.

The College Completion Agenda: Practical Approaches for Reaching the Big Goal Sep 30 2022 This volume provides practical ways colleges can focus on the College Completion Agenda. Originally begun as an economic workforce issue for the Obama administration, the College Completion Agenda has been adopted by myriad educational institutions, public and private funders, and others. The identified “Big Goal” is to

increase the proportion of Americans with high quality college degrees and credentials from 39% of the population to 60% by 2025. To date, much advice has been offered to colleges about what the issues are and what needs to be done. However, there is considerable work being done at colleges around the country to address the identified issues. This volume introduces some of these policies and practices—the thinking behind them, research supporting them, roles to be fulfilled, and impact on the student experience. This is the 164th volume of this Jossey-Bass higher education quarterly report series, an essential guide for presidents, vice presidents, deans, and other leaders in today's open-door institutions, this quarterly provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.
