The challenge of widening access and participation in higher education in a manner that ensures students are successful in their studies is a major issue globally and a significant research-focus within higher education studies and higher education policy. Similarly, the challenge of under-preparedness of students entering higher education has become increasingly pertinent as universities in both developed and developing countries struggle to improve their throughput rates in a context in which schooling no longer seems to provide sufficient preparation for entering university. In this book Merrydy Wilson-Strydom applies the capabilities approach to better understand university access and participation and draws on a rich case study from South Africa to critically and innovatively explore the complex and contradictory terrain of access with success. The book integrates quantitative and qualitative research with theory and practical application to provide a new framework for considering and improving the transition from school to university. University Access and Success will appeal to academics and researchers in the field of higher education internationally. The book also contributes to the growing body of international and comparative scholarship on the capabilities approach in higher education and will therefore be of value to higher education practitioners, such as those working in the promotion of teaching and learning, higher education quality assurance, institutional research and student affairs. WITH AN INTRODUCTION BY CARYL PHILLIPS In 1945, Rick Braithwaite, a smart, highly educated ex-RAF pilot, looks for a job in British engineering. He is deeply shocked to realise that, as a black man from British Guiana, no one will employ him because of the colour of his skin. In desperation he turns to teaching, taking a job in a tough East End school, and left to govern a class of unruly teenagers. With no experience or guidance, Braithwaite attempts to instill discipline, confound prejudice and ultimately, to teach. In 1996, Dr. Nancy Olivieri identified an unexpected risk associated with a drug she was testing to treat a rare blood disorder. When she moved to inform patients of this risk as required by medical ethics, the drug manufacturer, Apotex, terminated the research trial and threatened to take legal action. This was the opening salvo in a long contest involving Olivieri, Apotex, Toronto's Hospital for Sick Children, and the University of Toronto. Olivieri expected to receive support on the ethical issue from the hospital and the university, but neither institution provided effective support against ongoing legal harassment by Apotex. Intense media coverage followed the case from beginning to end. The Olivieri Report is the

report of an independent inquiry--commissioned by the Canadian Association of University Teachers--into the case, conducted by three widely respected Canadian academics. While some try to get out of prison, Soapy, the only character in O. Henry's short story, tries to get into it. Soapy is a homeless guy who prefers the warm cell to the cold night under the New York sky. He does everything he can think of in order to draw the attention of the police. However without any success. Until he hears a magical organ anthem. How will this story develop? Will Soapy manage to get into jail or he will find another way to sort out his life? "The Cop and the Anthem" is a comical short story with a touch of irony which emphatically presents the lower class and the obstacles man has to face. William Sidney Porter (1862-1919), known simply as O. Henry, was a prolific American author of humorous literary pieces. His fame came exceptionally quickly and he became a bestselling author of short story collections, among the most famous being "Cabbages and Kings", "The Voice of the City", and "Strictly Business." As a result of the outstanding literature legacy that O. Henry left behind, there is an American annual award after his name, given to exceptional short stories. H.S.C.
