This court epic describes events leading up to but not including the birth of Kumara (also known as Skanda or Karttikeya), the war god destined to defeat the demon Taraka. The gods attempt to deploy Kama, the Indian Cupid, to set the ascetic supreme deity Shiva on fire with love for Uma (also known as Parvati), the daughter of the god of the Himalayan mountain range. Kama's mission fails, and Shiva, roused from his meditative trance, turns his flaming third eye on the love god, burning him to ashes. Next, Parvati herself turns to intense asceticism in order to win spiritual power and thereby the husband for whom she longs. She succeeds, and the climax of the poem is Shiva and Parvati's marriage and cosmic lovemaking, and Kumara's divine conception. Vols. for 1970-71 includes manufacturers' catalogs. *Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and

masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health. Web services and Service-Oriented Computing (SOC) have become thriving areas of academic research, joint university/industry research projects, and novel IT products on the market. SOC is the computing paradigm that uses Web services as building blocks for the engineering of composite, distributed applications out of the reusable application logic encapsulated by Web services. Web services could be considered the best-known and most standardized technology in use today for distributed computing over the Internet. This book is the second installment of a two-book collection covering the state-of-the-art of both theoretical and practical aspects of Web services and SOC research and deployments. Advanced Web Services specifically focuses on advanced topics of Web services and SOC and covers topics including Web services transactions, security and trust, Web service management, real-world case studies, and novel perspectives and future directions. The editors present foundational topics in the first book of the collection, Web Services Foundations (Springer, 2013). Together, both books comprise approximately 1400 pages and are the result of an enormous community effort that involved more than 100 authors, comprising the world's leading experts in this field. She’s created one of the freshest, funniest characters I’ve ever read....32 Candles is a charmer.” —Carleen Brice, author of Orange Mint and Honey 32 Candles by exciting newcomer Ernessa T. Carter is the slightly twisted, utterly romantic, and deftly wry story of Davie Jones, who, if she doesn’t stand in her own way, just might get the man of her dreams. For fans of John Hughes’s “Sixteen Candles”, 32 Candles is a fresh and fun fiction debut for every fan of romantic comedy. Cartoonist Benjamin Marra brilliantly satirizes America’s obsession with justice ? and disinterest in consequences ? via a highly stylized, hypermasculine style that gushes with violence, sex, and international intrigue, battering down the boundaries between psychedelia, political commentary, and aggressive expressionism. The economic status of young people has declined significantly over the past two decades, despite a variety of programs designed to aid new workers in the transition from the classroom to the job market. This ongoing problem has proved difficult to explain. Drawing on comparative data from Canada, Germany, France, Sweden, and the United Kingdom, these papers go beyond examining only employment and wages and explore the effects of family background, education and training, social expectations, and crime on youth employment. This volume brings together key studies, providing detailed analyses of the difficult economic situation plaguing young workers. Why have demographic changes and additional schooling failed to resolve youth unemployment? How effective have those economic policies been which aimed to improve the labor skills and

marketability of young people? And how have youths themselves responded to the deteriorating job market confronting them? These questions form the empirical and organizational bases upon which these studies are founded.
