Measuring Second Language Vocabulary Acquisition Jul 25 2022 Measuring Second Language Vocabulary Acquisition provides an examination of the background to testing

vocabulary knowledge in a second language and in particular considers the effect that word frequency and lexical coverage have on learning and communication in a foreign language. It examines the tools we have for assessing the various facets of vocabulary knowledge such as aural and written word recognition, the link with word meaning, and vocabulary depth. These are illustrated and the scores they produce are demonstrated to provide normative data. Vocabulary acquisition from course books and in the classroom is examined, as is vocabulary uptake from informal tasks. This book ties scores on tests of vocabulary breadth to performance on standard foreign language examinations and on hierarchies of communicative performance such as the CEFR.

The Book With No Pictures Apr 22 2022 You might think a book with no pictures seems boring and serious. Except . . . here's how books work. Everything written on the page has to be said by the person reading it aloud. Even if the words say . . . BLOrk. Or BLUURF. And even if the words include things like BLAGGITY BLAGGITY and MY HEAD IS MADE OF BLUEBERRY PIZZA! That's the rule. That's the deal.

Brilliantly irreverent and very, very silly, The Book With No Pictures will delight kids and have them begging for more.

From award-winning US comic writer and actor, B.J. Novak.

Education and Society in the Middle East and North Africa

Jan 07 2021 In the past, the Middle East and the so-called Muslim world used to be beacons of learning and critical thought. Although historical variables—such as conquest, internal conflict, and colonization—demoted their position on

the global stage, changes are now in the offing. In these interesting times, a growing number of educators, thinkers and visionaries are trying both to find and to generate new approaches to the past, present, and future of the region. This book is a collection of articles which reflect on various aspects related to education and society in the Middle East and North Africa (also known as the MENA region), their peoples and educational processes. It provides a platform for people to join the global conversation and to contribute to it with data which are relevant to regional concerns, research and practices. This is necessary because many of the theories and research findings which are still being used to understand the region were generated elsewhere and, despite their lack of regional representativeness, were generalized as the most trustworthy interpretive tools across the world. Hence, there is a need for the world to open up to the voices from the MENA region.
